

Written Clarification - Recyclability and Collection Route of PA15-PE80 Film

Source document: *S7_Trascrizione_email_riciclabilita_PA15-PE80.pdf*

Nature of this document

Faithful English courtesy translation of the Italian transcription of an e-mail communication received from Silvano Plast and retained in Casa Principe's company records. It is provided for ease of consultation and is not an independent certificate.

Supplier communication

With reference to the PA15-PE80 film reels, we confirm that the structure is recyclable in the plastics stream, as it can be recovered through material recycling according to the applicable criteria.

The correct collection stream is therefore the plastic-packaging stream, in accordance with the separate-collection arrangements in force in the relevant territory.

We remain available for any further clarification and send our kind regards.

Added to the Casa Principe dossier on 26 August 2026.
